hands at a decline of two points. Following the initial dealings there was a substantial recovery in the coal shares, but they closed with net loss, ranging from one to nearly five points. Lehigh Valley suffering the most.

- Industrials Not Harmed

Industrial shares seemed to show little, if any, effect from the coal rate decision, and were strong up to the last hour, when they had a weakening spell, but recovered most of the drop by the close. The recovery was in full swing when the gong clanged for the end of trading, leading to the expectation of its continuation

The Safest Investments

Are those that do not fluctuate during dis-turbed conditions of the money or stock mar-kets. First deed of trust notes (first mort-ages), well secured on real estate in the Dis-trict of Columbia, constitute "gilt-edge" in-vestiments. They do not depend upon the financial responsibility of individuals or cor-porations for their stability, and are enough from taxation as personal property. early tomorrow.

In the early session motor stocks attracted attention with sharp advances under the leadership of Willys-Overland. It rose eighteen points, but lost six points of this gain before the close. Maxwell Motors common rose five points and Studebaker, touched the new high of %5 on expectation that the dividend will be increased.

One favorable news development was the decision upholding an increase in the rate on bituminous coal from Mississippi River crossings and junction points in Tennessee. Mississippi and Louisians.

Rumely shares continued active, the common rising to the new high for this movement of 14.

NEW YORK CURB.

New York, Aug. II.—Specialties were again the center of interest of today's trading in the outside securities market, but the aggregate volume of dealings was the smallest that has been reported in some time. Dealings, too, were without special feature, interest being scattered throughout a broad list of issues, although some interests had been shown in Canadian and Feundry shares at the start. Despite the fact that the dealings in the Electric Boat shares has subsided to a considerable extent, when compared with the dealings of previous sessions, a steady price tone was maintained. Cramp Shipbuilding was alightly improved in price, showing a gain of over the close of yesterday on small sales. Canadian Car and Foundry were firmer. Other war stocks were fairly active and about steady.

The miscellaneous specialties were fairly active and somewhat irregular. Mining shares were quieter, but a steady price tone was maintained.

NEW YORK MONEY.

New York, Aug. 13.—Call money opened 1% per ent, high, 2 per cent; low, 1% per cent; renewals, is per cent; last, 1% per cent; ruling, 1% per the per cent; last, 1% per cent; ruling, 1% per cent.

Time money showed further declines for peacitically all maturities. This decline has brought increased offerings of money even at the lower prices. More loans are reported to have been made at any time since the middle of July.

This decline is attributed in some quarters to the behief that there will be further shipments of gold to this country for England's credit before the said of the month. Also they will amount to acteral times this weeks' receipts. These future shipments will probably follow the example of being made up partially of American securities.

Very little year money is being placed, although freely offered by the banks at 4 per cent for mixed loans and 6% per cent for industrial ioans. Borrowers maintain that they are willing to take a chance on renewals six months hence as they can now borrow six months money at 3% per cent or slightly better, which gives them the leeway of six months renewals up to 6% per cent.

Rates are 25% per cent for sixty days, 2%2% per cent for ninety days, 2%3 per cent for four months, 325% per cent for five and six months and 4 per cent for twelve months.

The continued inactivity of the market is beginning to discourage brokers, who frankly express their disappointment at the small borrowing demand. While hope of a revival in general business, such as will produce an infereased inquiry for funds is still held out, bankers and brokers alike have about given up making any definite predictions as to an advance of the uncertainty of the international situation with both Europe and Mexico.
